

We are a medical research institute with more than 300 people located at the Lowy Cancer Research Centre committed to curing childhood cancers

The Embryonal Cancer Therapy and Prevention Group is headed by Professor Glenn Marshall and Dr Belamy Cheung currently has:

5 Post-Doctoral Scientists

1 Research Assistant

3 PhD Students and 1 Honours Student

1 Project Leader and 2 Clinical Fellows

There are plenty of US to look after YOU!

Research projects:

(1) Developing inhibitors for MYC oncoproteins.

(2) Developing childhood cancer prevention strategies.

(3) Identification of oncogenic proteins in MYC-driven cancers.

YOU will be supervised by Dr Belamy Cheung (Principal Scientist) and co-supervised by an experienced Post-Doctoral scientist to ensure that YOU are being looked after.

YOU will conduct clinically significant research and develop into an independent researcher. We would like you to be a professional and committed individual because this is important for you and us.

Dr Belamy Cheung, bcheung@ccia.unsw.edu.au
