Special Details

Important announcements and any changes to this document will be posted on the Moodle course website. This document will be available on the site.

2. Staff Involved in the Course

Convenor/Lecturer  Dr Kelly Clemens  MAT 909  k.clemens@unsw.edu.au
Co-convenor/Lecturer Dr Belinda Liddell  MAT 1100  b.liddell@unsw.edu.au

Guest Lecturers

A/Prof Denovan Begg  MAT 708  d.begg@unsw.edu.au
Dr Justine Fam  MAT 706  j.fam@unsw.edu.au
Dr Karly Turner  MAT 404  karly.turner@unsw.edu.au
Dr Colin Palmer  MAT 1015  colin.palmer@unsw.edu.au
Prof Tom Whitford  MAT 913  t.whitford@unsw.edu.au

3. Course Details

Course Description & Aims

The course is an introduction to behavioural neuroscience, focusing on traditional approaches, the integration of technological advances into behavioural neuroscience and translational outcomes.

The aims of the course are to provide you with:

- Understanding of how basic research in behavioural neuroscience is used to advance treatments in neurological and mental health disorders
- Knowledge of behavioural neuroscience and how it relates to human disorders, in particular mental health
- New approaches and techniques used in behavioural neuroscience, including potential limitations or pitfalls

Student Learning Outcomes

The learning outcomes of this course (that will be assessed through oral and written assessments and exams) are as follows:

1. You will demonstrate knowledge and general empirical understanding of the techniques and approaches used in the study of behavioural neuroscience in humans and animals.
2. You will demonstrate a broad overview of the area of behavioural neuroscience, including strengths and limitations
3. You will demonstrate the skills of critical thinking, conceptual analysis, and oral and written expression.
5. Course Schedule
Weekly seminars by guest lecturers will follow the following format:

- 50 min - Introduction to topic, focusing on discipline-specific techniques and approaches.
  o What is the big question we are trying to answer in this field?
  o How can this question be addressed using behavioural neuroscience?
- 10 min break
- 50 min – In depth discussion of empirical paper showing application of this approach
- 10 minutes for general questions and discussion

Required readings will be posted 1 week prior but are not examinable. Seminars will not be recorded.

Tue. 16-2  Week 1: Introduction to NEUR4411, including information for assessments
  Modeling mental health disorders: Addiction
  Dr Kelly Clemens

Tue. 23-2  Week 2: Modeling mental health disorders: Impulsivity and compulsivity
  Dr Karly Turner

Tue. 2-3   Week 3: Oxytocin – more than just a love hormone?
  Dr Justine Fam

Tue. 9-3   Week 4: Group Presentations 1
  Dr Kelly Clemens/Dr Belinda Liddell

Tue. 16-3  Week 5: Group Presentations 2
  Dr Kelly Clemens/Dr Belinda Liddell

Tue. 23-3  Week 6: Flexibility Week (no classes - essay due 26/3/21)

Tue. 30-3  Week 7: Modelling Reward Dysfunction: Obesity
  A/Prof Denovan Begg

Tue. 6-4   Week 8: Determining biomarkers of PTSD: the role of human brain imaging
  Dr Belinda Liddell

Tue 13-4  Week 9: Exploring the basis of auditory hallucinations in schizophrenia
  Prof Tom Whitford

Tue. 20-4  Week 10: Sensory experience and cortical function in autism
  Dr Colin Palmer

Tue. 4-5   Final Exam
6. Assessment Tasks

Assessment
Your mark for the course is derived from:

1. **Group Presentation (1 x 30%)**
   - Topics and format will be given in class week one

2. **Essay**
   - Topic will be given in class week one
   - Due Friday 26th of March (5pm)
   - A late penalty of 10%/day will apply

3. **Exam**
   - Short answer questions
   - Tuesday May 4th, 10 am – 12 pm MAT 310 or online

UNSW Academic Honesty and Plagiarism

Academic honesty and plagiarism includes misconduct such as cheating (on exams or by copying other students’ assignments) and plagiarism. To avoid plagiarism, you must acknowledge others’ work by referencing it. If you are unsure about what constitutes plagiarism, please talk with the lecturers or tutors. Please read the following explanation carefully, and note the website you can also consult (http://www.lc.unsw.edu.au/plagiarism/index.html).

The penalties for academic dishonesty are severe, and can at the very least mean failure in the assignment or exam or the course, and also can mean exclusion from the university for two years. Please read the UNSW academic honesty policy at http://www.lc.unsw.edu.au/plagiarism/index.html
